

Gladys Kanyora

Software Developer

A Software Developer, passionate about building mobile and web applications. Excellent problem-solving skills, good working with a team. I have experience with HTML, CSS, and Javascript. Some of the Javascript libraries that I have used, include, React, Angular, and Vue JS. I have also worked with Java, Kotlin, and Android to build mobile applications. I have worked with version control systems like Git.

EDUCATION

Software Development

Moringa School

09/2020 - 05/2020

Nairobi

Courses

- Android Development

Diploma in Computer Information System

Kenya Methodist University

09/2018 - 03/2021

Courses

- Computer Information System

HIGHLIGHTED SOFTWARE APPLICATION

Patient Tracker (09/2021 - 03/2021)

- This is a mobile application that uses the Yelp API, to retrieve the locations of clinics or hospitals.
- Using Java and Android xml, I developed an application with a register page, a form to fill in your location. The work of the Yelp API is to retrieve the clinics and the hospital around your location.

Tap-IT Mobile app (04/2021 - 05/2021)

- Worked with a team of four mobile developers, to develop this application that helps the field agents to collect the water meter readings, easily.
- Using Java and android XML, I developed the registration form.
- I implemented a camera using camera-x, a jetpack support library, that made the camera app development more accessible.

GitApp

- A project, to display projects that a user has done and saved on the GitHub Account.
- Using Angular a framework of JavaScript, I created the landing page, an entry form for the user name.

AFFILIATION AND LEADERSHIP

Secretary

Christian Fellowship Kenya Methodist University

06/2019 - 03/2021

Achievements/Tasks

- managing and facilitating the movement
- mobilising students from the university to join the movement
- Organizing events of the fellowship

TECHNICAL SKILLS

Android, Kotlin

HTML, CSS, JavaScript, React

Java

Angular

Java, Kotlin

ACHIEVEMENTS
